

## Water Quality Assessment (Form V)

Name of operation:

Possible sources of contamination of irrigation water include nearby animal facilities such as feedlots, direct livestock access to surface water or well heads, spills of chemicals or fuel. All possible (such as nearby dairies, etc.) and actual (such as chemical spills) contamination sources are recorded, and corrective actions are noted. Visual assessments are required, preferably before and during the growing season.

Field or field group	Date of <u>Visual</u> Assessment	Conditions	Corrective Actions Taken
		Nearby livestock production?  Waste/chemical spillage or disposal?  Other:	
		Nearby livestock production?  Waste/chemical spillage or disposal?  Other:
